... *from KERSCHER GMBH*

KERSCHER GMBH manufactures fixings for formwork and fall arrest systems for use on concrete buildings.

These specialist items have, until now, only been available to the German market. New trade openings are sought throughout Europe with companies already involved with formwork solutions. The system has achieved the German high DIN Standard and has also attained the 'GS stamp' certifying it for use up to a height of 100m. KERSCHER will be at Stand 329 / A2.
